PROFESSIONAL SUMMARY

Marketing and Growth professional with 6+ years of experience in B2B strategy, demand generation, brand positioning, and business development across the technology, energy, and financial services sectors. I combine business vision, data analysis, and technology to design strategies, automate processes, and turn opportunities into measurable results.

PROFESSIONAL EXPERIENCE

- Marketing Lead — Aeroterra SRL (Esri Inc.)

Jul 2025 – Present

Software / Geospatial Technology (GIS) — Argentina & Uruguay

 - Lead B2B marketing strategy for Argentina and Uruguay, focused on qualified demand generation and commercial pipeline development.
 - Design and optimize campaigns, marketing automation workflows, and email marketing strategies focused on lead acquisition and conversion.
 - Plan and fully execute corporate events, webinars, and demand-generation initiatives.
 - Manage the content ecosystem, primarily LinkedIn, reaching 288K+ impressions and a 12.5% average engagement rate over the past year.
 - Develop and maintain the corporate website via Adobe Experience Manager (AEM).
- Chief Marketing Officer (CMO) — Desitec

Oct 2021 – Jul 2025

Oil & Gas — National & international markets

 - Led the company's commercial and marketing strategy, overseeing brand positioning, opportunity generation, and business development.
 - Drove the sales strategy behind revenue growth of 331% in 2023 and 129% in 2024.
 - Expanded commercial operations into international markets, managing the full customer journey and export logistics.
 - Designed and implemented marketing strategies that increased brand visibility at industry trade shows and business roundtables.
 - Positioned the company as a market reference in telemetry, leading brand communication and industry presence.
- Financial Analyst — Finantech SAS

Feb 2020 – Oct 2021

Fintech / Financial Services

 - Analyzed large volumes of data using Power BI, SQL, and Excel to generate insights supporting business decisions and risk reduction.
 - Developed financial analyses and analytical models to evaluate operations and support corporate credit decisions.
 - Conducted solvency assessments and financial diagnostics.
 - Optimized analytical processes to improve response times and data-driven decision-making.
